ANALYSIS

- The **hospital scores trend down**, resulting in a **1.99%** decrease between July 2015 and July 2023. The score started trending down on Monday, July 1, 2019, **falling by 3.36% (2.41) in 4 years**.
- At **74.89%**, **West North Central** had the **highest** Top and was 11.29% higher than **Mid-Atlantic**, which had the lowest Top at **67.30%**.
- Hospital score was highest for **South Dakota** at **76.81%**, followed by Nebraska and Louisiana.
- Among measures, **Discharge Information** is most effective & **Care Transition** is least effective.
- **South Dakota** state is observed with **most satisfied patients** with score of **76.81%** followed by **Nebraska** with score of **76.72%**,
- **District of Columbia** has **least satisfied patients**.
- Measures like **Communication with Nurses**, **Willingness to Recommend the Hospital**, and **Communication with Doctors** needs major improvement in order to increase patient's satisfaction level.

Measures With Major Improvement Opportunity for Given Regions

Region	Communication with Doctors	Communication with Nurses	Willingness to Recommend the Hospital
East North Central	4.07%	3.44%	4.38%
East South Central	4.17%	4.89%	5.67%
Mid-Atlantic	5.52%	5.19%	6.59%
Mountain	4.78%	4.29%	5.11%
New England	4.39%	3.70%	4.65%
Pacific	4.80%	4.47%	5.07%
South Atlantic	5.33%	5.65%	6.55%
West North Central	3.16%	2.75%	3.14%
West South Central	4.06%	4.22%	4.94%

RECOMMENDATIONS

1. Optimum patients satisfaction can be achieved by improving the measures that fall in bottom of Top scores as they require little more improvement for better results.
2. States with lowest scores must get guidance from states with highest scores.
3. Efforts need to be made to increase over all response rate in order to get better understanding of patient's needs.
4. Measures with major improvement opportunities must also be worked upon to facilitate patients like improving Communication with Nurses etc.
